

A scatter plot showing the relationship between 'outlier' status and 'no\_outlier' status. The plot features a dense cloud of blue '+' markers representing 'no\_outlier' data points, which are concentrated in the upper half of the plot. Red '+' markers represent 'outlier' data points, which are scattered throughout the plot, with a higher density in the lower half. A legend in the bottom-left corner identifies the red '+' as 'outlier' and the blue '+' as 'no\_outlier'.
